Design Designation:

Intravenous

Tip Type:

Short bevel

Connector Type:

Female luer lock or female luer slip

Needle Diameter:

16.000 gage

Catheter Length:

2.000 inches

Material And Location:

Plastic hub and steel, stainless needle and plastic, polypropylene catheter and plastic, fluorinated ethylene catheter or plastic, propylene catheter

Features Provided:

Sterile and disposable and x-ray opacity

Special Features:

Radiopaque, nontoxic, pyrogen-free 16 gage by 2 inch catheter with a self-vented chamber an indwelling catheter for use in administration of intravenous fluids from a single venipuncture in preoperative and post-operative treatment, plastic catheter and needle hubs provides a leakproof fit; 50 catheters per package

Style Designator:

Intravenous catheter and needle unit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A22100
