Overall Length:

8.000 inches

Overall Diameter:

4.0 millimeters

Unit Type:

Suction

Grip Type:

Thumb-finger

Design Form:

Angular shaped

Surface Treatment And Location:

Plastic polytetrafluoroethylene bottle

Special Features:

Curved; disposable; self-contained; c/o preevacuated vacuum bottle w/integral removalbe tissue collector trap, and cap; safety cap w/connector to accommodate 4 mm sterile plastic cannula-curette, and on-off valve to control vacuum; min. Vacuum of 25 in. Hg is activated when valve is opened; for use in collecting tissue fragment specimens of the endometrium for early cancer detection; unit q type 12

Material And Location:

Glass bottle and plastic vial

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A520p0
