Body Material:

Plastic

Filtering Surface Area:

1.4 square meters

Sterility:

Sterile

Disposition After Initial Use:

Disposable

Capacity Accommodated:

259.0 milliliters

Dialyzer Element Form:

Hollow fiber

Special Features:

Blood volume 109 ml, dialysate volume 150 ml; high performance model for use with patients who have an increased need for fluid removal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T117-e
