Overall Width:

0.188 inches

Handle Type:

Rectangular

Material And Location:

Steel, corrosion resisting

Blade Edge Type:

Any acceptable

Product Name:

Chisel-adjustment instr femoral neck crs 0.188in w blade 8"lg

Special Features:

Blade dim 8 in. Lg; 1 in. Lg, 1/2 in. Dim; for preparation of the femoral neck in hip arthroplasty; used prior to insertion of the rasp, and after preparing the bed for the prosthesis stem

Unit Of Issue Cube:

0.001 cubic feet

Unit Of Issue Weight:

0.01 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T133-a
