Design Designation:

Swan-ganz thermodilution

Tip Type:

Balloon and open end

Core Fabrication Method:

Woven

Diameter:

7.000 french

Material And Location:

Plastic, polyvinyl chloride catheter and rubber, latex balloon

Features Provided:

Sterile and disposable and x-ray opacity

Special Features:

110 cm. Long; heparin coated; quadruple lumen; thermister and thermister lead connections; 3 cc syringe

Style Designator:

Intravenous injection

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A22100
