Current Type:

Ac/dc

Accessory Components And Quantity:

Case, 1; power pack w/controls, motor, pump, vacuum bottle, vacuum gauge and regular, 45 in. (114.3 cm) long suction tubing, battery charger, 6 ft (1.8 meter) long vehicle battery cable assembly

Installation Design:

Portable

Control Method:

Gage and regulator

Controlled Suction Source:

Included

Suction Produced In Millimeters Of Mercury:

550.0

Thermotic Type Feature:

Not included

Product Name:

Suction apparatus surgical portable battery oper self-contained

Voltage In Volts:

12.0 or 115.0

Special Features:

Self-contained; battery operated; recharge time 24 hrs. Max; 90 min low-speed and 60 min high-speed operating time; 4 to 115 degrees f (-20 to 45 degrees c) operating temp range; 480 ml collection container capacity; for use in aspirating oropharyngeal, nasopharyngeal, or tracheal secretions in the emergency treatment of injured, unconscious, or intubated personnel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T107-c
