Design Designation:

Philips

Shaft Eye Quantity:

1

Tip Type:

Threaded

Core Fabrication Method:

Woven

Diameter:

0.263 inches

Material And Location:

Fabric, woven body and metal tip

Product Name:

Catheter urethral philips b9 str w/thd tip 0.263" 12 inch length, 20 fr metal flex sterile

Special Features:

Flex; 12 in.; polyester or nylon; integral metal tip on distal end permits attach to a filiform; flared proximal end to connect to syringe; capable of withstanding repeated sterilization by steam, ethylene oxide, or soaking in high level disinfectant solution

Style Designator:

Straight, w/ threaded tip

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A22100
