Body Material:

Regenerated cellulose

Filtering Surface Area:

1.2 square meters

Sterility:

Sterile

Disposition After Initial Use:

Disposable

Capacity Accommodated:

80.0 milliliters

Dialyzer Element Form:

Hollow fiber

Membrane Thickness In Microns:

12.0

Special Features:

Ultra filtration rate 4.2; saline solution

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T117-e
