Design Designation:

Left mainstem bronchus

Inflation Device:

Pilot balloon

Tip Type:

Beveled

Core Fabrication Method:

Not woven

Diameter:

39.000 french

Material And Location:

Plastic, polyvinyl chloride tube

Product Name:

39 fr double lumen endobronchial tube

Special Features:

W/self-sealing valve cuff; i.D. Lumen dia. 7.0mm tracheal/bronchial; color-coded; w/assembly includes: 1-broncho-cath w/stylet; 3-gentle-flo special length suction catheters w/vactrol connector; 2-polypropylene connectors; 2-right angle connector assemblies/standard carlens tube adapter; ethylene oxide gas sterilization; if subject item has been in climate controlled environment for over 60 months and has not been utilized; then it's time for disposal

Style Designator:

Double lumen duodenal tube with balloon on distal tip

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A22100
