Product Name:

Oximeter pulse: 120/230v 50/60hz ac or battery operated

Special Features:

Lightweight; portable; freestanding unit; without container; suitable for attachment to anesthesia equipment for use in surgical environment; 12 in. W, 5 in. H and 12 in. Deep; 120/230 v, 50/60 hz, ac or battery operated; continuous digital readout of both oxygen saturation level and pulse rate; audible/visual alarms for high/low oxygen saturation, high/low pulse rate, and probe failure/disconnection; preset high/low alarm parameters and user adjustable; alarm silencer and continuous display of parameters; capable of simultaneous and continuous real-time measurement of arterial hemoglobin oxygen saturation, pulse rate and pulse rate amplitude; supplied with one each non-disposable finger clip sensor, one each patient interface cable 9 feet (2.74 meter), one each battery, integral with oximeter, one each pole mount system, two each operator's manual; aeromedically certified for fixed wing and rotary aircraft with combined essential characteristic requirements

Supplementary Features:

All probes or sensors may be specifically sized for adult, pediatric, infant and neonatal use, or allow use of a sensor type or style with regard to patient size; joint airworthiness certification (jac)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiiig:

T133-f
