Product Name:

Ventilator prtble vol 120v 50/60hz ac or 12v dc transport case

Special Features:

Time cycled, pressure limited, piston driven constant flow, microprocessor controlled, 120 v, 50/60 hz, ac or 12 v dc; in transport case; w/5 modes, control, control plus sigh, assist-control, assist-control plus sigh and synchronous intermittent mandatory ventilation providing sensitivity control for positive end expiratory pressure value; c/o internal battery w/charger, patient valve, removable positive end expiratory pressure valve; adapter to patient valve to allow easy spontaneous breathing, external pressure limiter to allow pressure cycling, hoses, tubing, connectors, ac power supply and internal oxygen/air blending; provides digital lcd monitoring of tidal volume, breath per mi (bpm) rate, ratio of inspirat to expirat (i: e) , in spirat peak flow and gage monitoring of airway pressure; visual and/or audible alarms w/silence; for transport and inst care for child or adult

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T133-f
