Product Name:

Ventilator prtble vol 120v 50/60hz ac or 12v dc transport case

Special Features:

Time cycled; pressure limited; piston driven constant flow; microprocessor controlled; 120 v, 50/60 hz, ac or 12 v, dc; in transport case; w/3 modes, control, assist-control, and synchronous intermittent mandatory ventilation providing sensitivity control; c/o int btry w/charger, patient valve, removable positive end expiratory pressure valve, an adap to the patient valve too allow easy spontaneous breathing, an ext pressure limiter to allow pressure cycling, hoses, tubing, connectors, and ac power supply; prov digital lcd monitoring of tidal vol, breath per min (bpm) rate; ratio of inspiratory to expiratory (i: e), inspiratory peak of airway pressure; visual and/or audible alarms; for transporting and institutional care for a child or an adult patient

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T133-f
