Body Material:

Plastic, transparent

Filtering Surface Area:

1.0 square meters

Sterility:

Sterile

Disposition After Initial Use:

Disposable

Capacity Accommodated:

71.0 milliliters

Dialyzer Element Form:

Hollow fiber

Membrane Thickness In Microns:

12.0

Special Features:

Regenerated cellulose fiber, 235 mm.; ultrafiltration rate 4.8 in vitro and 3.6 in vivo; with port headers and luer-lock ports; 10/case

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T117-e
