**Body Material:**

Cellulose acetate

**Filtering Surface Area:**

1.5 square meters

**Sterility:**

Sterile

**Disposition After Initial Use:**

Disposable

**Capacity Accommodated:**

80.0 milliliters

**Dialyzer Element Form:**

Hollow fiber

**Membrane Thickness In Microns:**

15.0

**Special Features:**

Consists of thin, cellulose acetate hollow fibers contained within a plastic shell and sealed in place with a plastic sealant; 24 per package

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T117-e
