Unit Package Quantity:

10

Design Designation:

Oral and rae

Shaft Eye Quantity:

2

Tip Type:

Beveled

Core Fabrication Method:

Not woven

Diameter:

3.0 millimeters

Material And Location:

Plastic, thermoplastic

Features Provided:

Clear and sterile and disposable and x-ray opacity

Special Features:

Designed for use during nasal, ophthalmic, facial, and t/a surgery when airway management/surgical access needs are in conflict

Style Designator:

Tracheal w/0 cuff

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A22100
