Accessory Components And Quantity:

Supplementary oxygen inlet-1; reservoir tube-1; iso 22 mm type outlet fitting-1; non rebreathing valve-1; case-1

Product Name:

Vaporizer anesthesia drawover

Special Features:

Multiple agent; w/thermal compensating mechanism, maybe tilted 90 degrees or more, on or off position 85 ml liq agent capacity sufficient for 2 hr oper at normal flow rate. Breathing circuit includes hoses; self inflating bag, an ambu. E valve w/connection for passive gas scavenging and interchangeable 19 mm and 30 mm fittings. W/positive locking stop at the off position capable of utilizing a specific scale for isoflurane and flurothane w/a univ scale for enflurane

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T107-a
