Inside Diameter:

6.0 millimeters

Overall Length:

40.0 millimeters

Unit Package Quantity:

1

Design Designation:

Arterial and venous prosthesis

Tip Type:

Round

Core Fabrication Method:

Woven

Diameter:

6.0 millimeters

Material And Location:

Plastic, polytetrafluoroethylene tube

Features Provided:

Sterile

Special Features:

Straight, reinforced, autoclavabl; resterilized steam or gas

Style Designator:

Irrigation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A22100
