Unit Package Quantity:

1

Accessory Components And Quantity:

Recirculation, purge/sample port, 1; arterial outlet, 1; arterial temperature, monitoring adaptor, 1; gas inlet, 1; mounting blocks, 2; oxygenator, 1; gas outlet, 1; water ports inlet/outlet, 1; heat exchanger, 1; pressure monitoring luer port, 1; venous blood inlet

Features Provided:

Sterile

Special Features:

Surgical oxygenator with built in heat exchanger; pure silicone solid membrane; membrane surface 3.5 m²; static priming volume, 620 ml ; typical patient sizing, up to 160 kgs; recommended blood flow 6.5 liters/min; recommended gas flow 15.0 liters/min; used during routine cardiopulmonary bypass procedures

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T107-a
