Overall Length:

15.748 inches

Core Fabrication Method:

Woven

Material And Location:

Dacron, woven

Features Provided:

Sterile

Special Features:

Bifurcated; 16 mm by 8 mm size; velour; average porosi type 260 cc/min/cm2; integral guideline anterior and posterior; used for vascular grafting procedures

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A22100
