Body Material:

Cellulose acetate and plastic, polycarbonate and plastic, polyethylene and plastic, polypropylene

Filtering Surface Area:

2.100 square meters

Sterility:

Sterile

Disposition After Initial Use:

Disposable

Capacity Accommodated:

118.000 milliliters

Dialyzer Element Form:

Hollow fiber

Membrane Thickness In Microns:

27.0

Special Features:

Modified cellulose acetate membrane hemodialyzers; 12 per package

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T117-e
