Product Name:

Analyzer defibrillator-electrocardiograph transcutaneous:

Special Features:

Analyzer, defibrillator-electrocardiograph, tanscutaneous pacemaker (datpa)

General Description:

Battery operated, w/15v 60hz charger; 9.8 in l; 10/6 in w, 3.5 in h; measures defibrillator energy outputs between 50 to 1000 joules w/an accuracy of plus/minus 2 pct; load resistance is 50 ohms; transcutaneous pacing testing; 12-lead ecg simulation; interative training capabilities; 4 line display; defibrillator training manikin interface

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
