Current Type:

Ac/dc

Portability:

Portable

Product Name:

Pump iv infusion sgl channel w/piggyback cap automatic delivery

Voltage In Volts:

120.0 and 12.0

Special Features:

Single channel with piggyback capability, dose, rate and concentration calculation; automatic intermittent drug delivery; iv site pressure event monitoring and trending; 0.1-9999.9 ml vtbi, 5-99.9 ml/hr micro mode; 0.1-999.9 ml/hr standard mode, programmable sequence of automatic rate changes, stackable design, free-flow protection, lockout, 0.1-2.9 ml/hr, or rate kvo, air-in-line, container empty, door open, downstream occlusion, hold time exceeded, low battery, low flow, close roller clamp, system error and upstream occlusion alarms; orderquantity type 1 to 49

Frequency In Hertz:

47.0 and 63.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T133-f
