Overall Height:

9.000 inches

Overall Width:

12.250 inches

Product Name:

Ventilator volume ptbl 12.25x9in 120/220 v ac

Special Features:

12.25 in. Deep; can operate from a 12 volt external battery, 12 volt internal battery, and 120 volt or 220 volt ac; controls delivered oxygen internally; has sigh capability, control mode, assist control, and simv; includes: external peep valve, internal oxygen blender, reusable container, nato litter mount, engstrom artificial nose, and single patient circuit kit; the internal oxygen blender has a unique oxygen conserving system, along with an optional sensor that provides feedback for precise enriched oxygen delivery; lcd display has backlighting for use in low light areas and during transport and an additional alarm led is provided for use in noisy environments i.E. Air transport

Supplementary Features:

Time-cycled; pressure limited; piston drive constant flow; microprocessor controlled; provides digital lcd monitoring of tidal volume, bpm rate; visual and/or audible alarms with alarm silence; has been tested and has passed the air force aeromedical certification requirements and is currently being tested for army aeromedical certification requirements

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T133-f
