Product Name:

Moloney murine leukemia virus reverse transcriptase (mmlv-rt)

Special Features:

Includes 10x reaction buffer and dtt; packaged in 50 u/ul quantity

Functional Description:

Used for first stand cdna synthesis from primed mrna templates; production of templates for use in rt-pcr amplification reactions; 5'-end transcript mapping via primer extension analysis; dideoxynucleotide sequencing using rna or dna templates; production of strand-specific radiolabeled probes; 3'-end labeling of duplex dna via end-filling reactions

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
