**Handle Type:**

Detachable and knurled and nonslip and round and straight

**Blade Quantity:**

1

**Usage Design:**

Used when undermining next to the skin to release fibrous tissue

**Blade Type:**

V-shape

**Size Designator:**

4mm by 26cm

**Grip Type:**

Knurled and one hand and straight

**Shank Type:**

Round

**Blade Size:**

6mm tip width

**Features Provided:**

Reusable

**Product Name:**

Cr cannula with 5/8 inch aluminum handle

**Special Features:**

Consists of a easy-to-grip handle with and effective cannula length of 26cm. The distal tip of the cannula is a flattened "v" shape which allows it to be easily directed into the targeted plane. The cannula has sharpened sides on the inner edge at the back of the "v" to make release of fibrous tissues quick and easy. At the same time the tips of the "v" are rounded to prevent cutting or tearing at the front of the cannula; 0.6250 inch handle width; 4mm cannula width; 6mm tip width; 26cm shaft length

**Material And Location:**

Stainless steel shaft and aluminum handle

**Shape:**

Angular

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
