Current Type:

Ac/dc

End Application:

For safe and rapid administration of fluid therapy

Portability:

Portable

Product Name:

Pump intravenous infusion ac/dc portable 120v/12v

Voltage In Volts:

120.0 and 12.0

Special Features:

Volumetric infusion; planar lithium battery pack; accurately measures fluid administration; capable of preselecting volume to be administered from 0.2 to 6.0 l/hr; includes air in-line, occlusion to indicate excessive resistance to flow and visible low battery alarms; capable of delivering crystalloid and colloid resuscitative fluids and fluids while iv bag is at or below patient level; reusable iv pole clamp; wall mounted reusable external power adapter; operates with a single use disposable cartridge with in-line air elimination; rugged design and single piece aluminum frame prevents damage from impact; multi-channel, small, lightweight, shuttle mechanism

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T133-f
