End Application:

Compatible with oscillometric nibr devices

Product Name:

Pulse oximeter simulator simulates ranges of normal hyper and hypotensive bp and normal bradycardial and tachycardial heart rates

Special Features:

SpO2 simulator; simulates range of normal, hyper and hypotensive non-invasive blood pressures representing typical adult, infant and neonatal patients. Generates normal, bradycardial and tachycardia rhythm selections with a wide range of user-programmable weak, normal and strong peripheral pulse amplitudes

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
