Product Name:

Lstat model g5 5 in. Thick ea portable critical care system for trauma and transport ea

Special Features:

Includes bi-phasic defibrillator, enhanced contrast on physiological monitor display for enhanced readability, motion-tolerant non invasive blood pressure sensor; motion-tolerant pulse ox sensor; mainstream end-tidal co2 capability; dose rate calculator on infusion pump; handheld secondary display allows lung compliance data, ability to input patient and user id and input events/actions, ability to select which Istat is being monitored, ability to access Istat maintenance functions including calibrating tilt and accelerometer sensors, setting Istat system time and date and setting up network parameters. The Istat patient care platform is fda cleared, patented intensive care unit; 13 cm thick

Supplementary Features:

Integrated within the Istat platform is a defibrillator, ventilator, suction, physiological monitor, 3 channel drug/fluid infusion pump and point of care blood chemistry analyzer. Includes on board batteries and oxygen to support stand alone capability and accepts off board power, oxygen and medical air sources from facilities or transport vehicles worldwide. It is equipped with a data system capable of storing and transmitting real time, continuous, time synchronized patient, equipment and environmental data to local and remote caregivers

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
