Product Name:

Omniflush soft vu 4 fr 90 cm pg 10s

Special Features:

Soft vu 4f high flow angiographic catheter, omni flush; unique tip weld transitions smoothly and securely from stiff shaft to flexible tip; less contrast reflux than other flush catheters resulting in lower total contrast dose; reforms and maintains shape even under injection pressure with less catheter whipping, resulting in less vessel wall injury; super radiopaque tip means better visualization and more accurate placement; top of omni flush shape to the tip end measures approx 15mm; 4 fr; 90 cm; 0.038"

Shelf Life:

N/a
