Design Designation:

Multiple diagnostic testing

Product Name:

Lsi igh/bcl2 dual color, dual fusion translocation probe

Special Features:

Mixture of the lsi ighprobe labeled with spectrumgreen spanning approximately 1.5 mb and containing sequences homologous to essentially the entire igh locas, as well as sequences extending about 300 kb beyond the 3 in end of the igh locas. The lsi bcl2 probe labeled with spectrumorange covers an approximate 750 kb region, including the entire bcl2 gene with additional sequences extending approximately 250 kb both distal and proximal to the gene

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T133-g
