Design Designation:

Multiple diagnostic testing

Product Name:

Lsi/rara dualcolor translocation probe

Special Features:

Mixture of the lsi pml probe labeled with spectrumorange and the lsi rara probe labeled with spectrumgreen. The pml probe covers the region that begins at intron 7, a span of 5.8 kb, and extends toward the centromere of chromosome 15 for approximately 180 kb. The rara probe begins about 500 bp 3' to exon 6 and extends approximately 400 kb toward the telomere of chromosome 17.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T133-g
