Product Name:

Simulator acoustic bas-200

Special Features:

Simulator provides quick and accurate daily calibration checks required by osha. Uses no batteries: power is supplied from audioeter and can be placed on table or mounted on test booth wall. Meets ansi standards for both sound level meters and octave band filters. Documents compliance with osha regulations and reports that ambient noise levels were not exceeded. Stores ambient noise levels with audiogram data. Supports osha, ansi, or user-defined permissibile ambient noise levels.
