Current Type:

Ac/dc

Control Method:

Gage and regulator

Controlled Suction Source:

Included

Voltage In Volts:

12.0

Special Features:

Used for resuscitation emergencies in prehospital care-rechargeable internal dual mode battery charger which monitors battery, charges battery when necessary, 45 min. Run time on fully charged battery

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T107-c
