Product Name:

5mm separator obturator

Special Features:

Product description: with it's unique sequential helix technology, enables atraumatic placement of laparoscopic ports without the use of any cutting devices, including metal or plastic blades. Upon cannula removal, the separated tissue re-approximates leaving a minimal linear defect. Benefits: the elimination of plastic & metal blades significantly reduces abdominal wall & vessel trauma. Muscle fibers remain intact, holding the cannula securely in the wall.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
