Inside Diameter:

10.0 millimeters

Overall Length:

70.0 millimeters

End Application:

Aneurysmal exclusion

Usage Design:

Use after deployment of gore excluder bifurcated endoprosthesis as additional length and/or sealing for aneurysmal exclusion

Design Designation:

Vascular

Design Form:

One-piece

Construction:

Woven fabric

Features Provided:

Hollow

Product Name:

Intender/back-up iliac extender

Special Features:

Iliac extender endoprosthesis; graft material is expanded eptfe and fep and is supported by nitinol wire along its external surface; deployment is made with a delivery catheter

Material:

Plastic, polytetrafluoroethylene

Material:

Plastic polytetrafluoroethylene

Shape:

Straight

Supplementary Features:

Has 3 radiopaque markers; 2 end markers, 1 at each end and 1 marker located 3cm below the proximal end

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T133-I
