Overall Length:

12.5 centimeters

Specific Use:

Securing specimens and tissue

End Application:

Reconstructive surgery

Design Form:

One-piece

Features Provided:

Flexible

Product Name:

Dermal regeneration template

Special Features:

84051 size 10cmx12.5cm; 34051 size 4x5inches; bilayer matrix that provides scaffold for dermal regeneration; biodegradable template that induces organized regeneration of dermal tissue; provides immediate wound closure; made of porous matrix of fibers of cross-linked bovine tendon collagen and a glycosaminoglycan and a temporary epidermal substitute layer is made of synthetic polysiloxane polymer (silicone)

Shape:

Flat

Special Test Features:

Fda approved

Supplementary Features:

Skin replacement system for treatment of deep partial-thickness and full-thickness thermal injury to the skin; serves as a template to generate neodermis that accepts edidermal autografts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T133-d
