End Application:

Sleep disorders and diagnostics equipment

Product Name:

Psg wireless or ambulatory system

Special Features:

Signals are conditioned and digitized then transmitted to base station for real-time data acquisition; data stored directly to computer; physiological parameters are monitored and recorded

Supplementary Features:

In-lab or out of lab applications; 25 channels; built-in pulse oximeter, electrode sensor connection, pulse transit time; auto sleep report generation psg amplifier system with bluetooth technology

General Description:

In-lab or portable sleep diagnostic testing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
