Product Name:

Adhesive sensor oxygen analyzer 24s

Special Features:

Adult >30 kg; designed with tear-resistant bandages and extra electronic shielding to protect the photodetector - light source relationship; can be used with earlier-generation nellcor pulse oximeters and nellcor-compatible monitors; sterile, adhesive sensors do not present the risk of the cross-contamination caused by products that are reused from patient to patient; durability makes them ideal for use with patient who may require extended monitoring as the patient travels to various points of care within the hospital; cost-effective option for patients who have adequate pulsatile perfusion; two-piece sensor combines a reusable cable with a single-patient-use adhesive sensor; sensor clicks into place in the cable connector and is easy to detach if monitoring needs to be momentarily discontinued

Supplementary Features:

18 in cable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T133-I
