Overall Length:

6.000 inches

Overall Height:

3.500 inches

Overall Width:

5.000 inches

Product Name:

Impedance threshold device for spontaneously breathing pts resqgard

Special Features:

An impedance threshold device (itd) that provides a safe, simple and convenient way to treat states of low blood pressure in spontaneously breathing patients; provides therapeutic benefit as soon as a patient begins to breathe through it; during inspiration a negative pressure (created from expansion of the thorax) draws air into the lungs; when the resqgard is applied to a breathing circuit it enhances the neegative pressure (vacuum) in the chest, which pulls more blood back to the heart, increased preload and thus, enhanced cardiac output on the subsequent cardiac contraction; weight: 7.8oz

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
