**Overall Length:**

13.000 inches

**End Application:**

Pectus excavatum and other sternal deformities

**Design Designation:**

Straight, flexible

**Material And Location:**

Steel, corrosion resisting

**Product Name:**

Pectus bar implant

**Special Features:**

Material stainless steel astm f138; uses pectus bar template p/n 01-3813; bar is shaped by using a pectus bender; bending for each patient

**Flexibility:**

Rigid

**Supplementary Features:**

Pectus bars rounded ends and blunt edges help minimize tissue destruction during implant insertion; minimally invasive surgical procedure developed by dr. Donald nuss called mipre

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T133-a
