End Application:

Neurosurgery

Err Default:

Err default

Product Name:

Csf-flow control shunt kit

Special Features:

Injectable reservoir dome; 1 or 2 occluders for selective flushing; non-metallic; membrane valve design with uniform internal flow path; polypropylene and silicone elastomer; catheter components-silicone; barium impregnation; polypropylene needle guard; radiopaque indicators show valve pressure, flow direction & valve to catheter approximations; integral valve connectors

Supplementary Features:

Size-regular; id 1.3mm; od 2.5mm; length 90cm; contoured; valve pressure-medium

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T117-a
