Overall Length:

10.250 inches

Overall Height:

2.750 inches

Overall Width:

6.300 inches

Product Name:

Detector insulation defect electrosurgical instrument probes

Special Features:

Insulation defect testing of electrosurgical probes and cables; lcd display; regulated dc output, adjustable from 0 to 8 kv; battery operated; checks disposable and reusable instruments; visual and audible alarm indicator with sensitivity control; 1.6 a slow blow fuse (5x20 mm); weight: approx. 4.85 lb

Functional Description:

For inspection and detection of defects, pinholes, or porosity in the applied surface insulation coatings of electrosurgical equipment, wires, and cables

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
