Thread Length:

25.0 millimeters

End Application:

Surgical fixation implant; arthroscopy

Outside Thread Diameter:

10.0 millimeters

Product Name:

Bioscrew, bioabsorbable interference screw, implant

Special Features:

Bioscrew bio-absorbable interference screw; poly (l-lactic acid); absorbs gradually and eventually disappears; single use-packaged sterile; 10mm diameter x 25mm

Supplementary Features:

Long-term absorption rate; ensures secure graft fixation through out healing process; can be overdrilled; tri-lobe accepts guardsman graft protector as optional protective barrier between screw and graft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T133-m
