Thread Length:

30.0 millimeters

End Application:

Surgical fixation implant; arthroscopy

Outside Thread Diameter:

11.0 millimeters

Product Name:

Bioscrew, bioabsorbable interference screw, implant

Special Features:

Bio-absorbable interference screw; poly (l-lactic acid); absorbs gradually and eventually disappears, single-use packaged sterile; 11mm diameter x 30mm (requires d8640 driver with attachment)

Supplementary Features:

Long-term absorption rate; ensures secure graft fixation through out healing process; can be overdrilled; tri-lobe accepts guardsman graft protector as optional protective barrier between screw and graft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T133-m
