Product Name:

Nebulizer, fixed cross-flow

Special Features:

For use with both aqueous and organic samples; has polymer body, polytetrafluoroethylene capillary tubing for sample uptake, noble alloy needle for sample flow, sapphire gas flow orifice; demonstrates excellent sensitivity, precision and high resistance to chemical corrosion; suitable for moderate levels of dissolved solids; operates on less than 1 liter/minute of argon

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T133-k
