Universal Medical Device Nomenclature System Code:

13215

Product Name:

Pump, intravenous infusion w/battery sigma spectrum

Voltage In Volts:

120.0

Special Features:

Infusion pump system w/ smart pump technology; multiple medication error prevention systems; configurable dose error reduction software (ders); single step titration limit; flow check at start of infusion; secondary container infusion check; bi-directional wireless communication; comprehensive log analysis software to create cqi reports

Frequency In Hertz:

60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T133-f
