Current Type:

Ac/dc

Product Name:

Ltv1200

Special Features:

Presets to allow rapid patient set-up; nppv6, cpap4, simv5, control, assist/control, and apnea backup ventilation modes; variable alarm settings; oxygen blending, volume control, pressure control, and pressure support ventilation; lockable front panel controls; high performance turbine technology allows ventilator to operate without an external compressed gas source; operates from a variety of power sources, such as ac power, internal battery, and external dc; ac adapter input: 100 to 250 vac, 50 to 60 hz, output: 13 vdc; input voltage: 11 to 15 vdc; internal battery: 12 v sealed lead acid, 4.5 ah; also includes: dust cover, protective boots, ac power converter, operator manual, and quick reference guide

Frequency In Hertz:

50.0 or 60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T133-f
