Product Name:

12mm endopath xcel dilating tip trocar

Special Features:

Cannula's integrated thread design provides greater abdominal was retention and minimal trocar slip-outs. Maintains abdominal insufflation while accommodating compatibility with a wide range of instruments (4.7mm to 12.9mm). Shield reset button engages blade shield that protects internal structures from damage during insertion. Designed with a low profile housing and seal to eliminate instrument hang-ups and low system drag force for lower peak instrument insertion/extraction force. Shaft length 150mm; quantity type 6

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
