Product Name:

Rhein ii loader

Special Features:

Designed to hold implants for loading into an inserter. Highly-polished blades are 5 mm in length, and the blade diameter is reduced for easier removal of the blades after the lens has been loaded. Makes removing the blades after loading easier, eliminating tic. Made of stainless steel, and provides a method for loading a lens by hand.

Material:

Stainless steel

Shelf Life:

N/a

Unit Of Measure:

--
