Features Provided:

Carrying case

Product Name:

Kit wound burn

Special Features:

For use in administering advanced critical care to patients with severe burns or other complex wounds; kit opens book-style to allow access to an assortment of silverlon contact dressings and other components, organized within individual easy view pouches; bag can be attached to other gear using molle or carried within a larger pack; silverlon contact dressings are designed for placement directly on the wound surface of an injury; the silver provides an antimicrobial barrier, protecting wounds from outside bacteria and fungi contamination
